“For over 40 years Topspeed have provide exceptional courier services for clients who require certainty, compliance, and end-to-end traceability of their consignments, especially where the consequences of loss or delay are significantly high.”

We do this by offering these delivery options:

- Secure Overnight
- Specialised Goods
- Same-Day Delivery
- Storage & Transit
- International

Gillian Lockley
Managing Director of Topspeed

 **0800 856 2464**

Topspeed is a leading UK logistics provider specialising in the secure transport of high-risk, regulated items. From our Winsford Operations Hub, we deliver reliable solutions nationwide.

With almost four decades of expertise, we are the trusted partner for clients requiring top-tier security and confidentiality.

Committed to sustainability, Topspeed aims for Net Zero by 2040 with a fully electric fleet by 2027, backed by rigorous environmental and carbon reduction efforts.

Fleet

- All vehicles are fully monitored using real time telemetry.
- Over 85% of the Topspeed fleet is electric, covering 73% of total mileage. Vehicles include the eCitan, eVito, eSprinter, and VW ID. Buzz. The diesel fleet includes Vito, Sprinter, Luton vans, a 5.5t Specialist Sprinter, and an 18-tonne truck.
- Many vehicles have been customised with specialist equipment and enhanced security.
- The fleet is kept in pristine condition by being maintained and regularly serviced in our in-house workshop, which now also includes a fully equipped MOT station.

Drivers

- All are employed directly by Topspeed and have undergone comprehensive security checks including DBS and vetted to SC Home Office standards.
- Each driver is assigned their own vehicle, and wears a full Topspeed uniform with photo ID, hi-vis jacket, protective footwear and personal protection equipment (PPE)
- Every driver completes a specialist in-house training programme in the Topspeed Academy to ensure deliveries are made efficiently and precisely

Sustainability

At Topspeed, we believe looking after the planet is just as important as looking after our customers. That's why sustainability sits at the heart of everything we do.

- **Net-Zero Ambition:** We're aiming for Net Zero by 2040, with a fully electric fleet on the road by 2027
- **Certified Green Leadership:** We're proud to hold ISO 14001, showing our commitment to doing things the right way.
- **Carbon Reduction Plan:** Our plan sets out clear, measurable steps to cut emissions year on year. Already, 86% of our fleet is electric, with 80% of our mileage powered by electric vehicles.
- **Smart Carbon Tracking:** By using a clever carbon-accounting engine, we can see exactly where emissions come from and how to cut them.
- **Hands-on Approach:** Because most of our emissions come from our own operations, we can keep a close eye and make real changes that count.
- **Future Focused:** Our roadmap is clear – innovate, reduce, and electrify – to make sure we're driving a greener tomorrow.
